

Unit 3 Test tomorrow!

Your homework this week is digital - Quizizz

You need to sign up for the Remind

Text 81010 and the subject should say @nicforr1

If you for some reason do not have a phone, I have a hard copy but you only get one.

Unit 3 Test Review

If you complete this, you should do stellar on the test!!

Name: _____

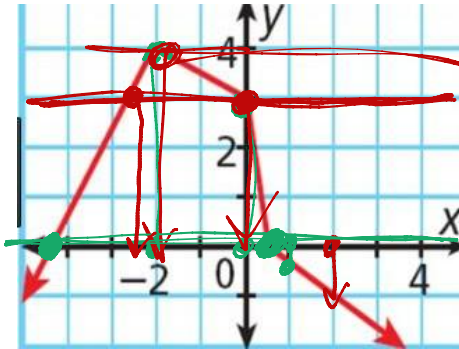

Think positive thoughts....but also read ALLLLLLL the directions!

- 1) Answer all the questions to the right to the best of your ability. Be sure you use your flipbook if you are still stuck!

Domain $[-6, 8]$	Range $[-7, 4]$
x-intercept(s) $(-5, 0) (1, 0) (7, 0)$	y-intercept $(0, 2)$
Absolute max: $(-2, 4)$	Absolute min: $(5, -7)$
Relative max: $(8, 3)$	Relative min: $(-6, -3)$
Increasing: $(-6, -2) (5, 8)$	Decreasing: $(-2, 5)$
Constant: none	End behavior: none
Function? yes	Continuous? <u>yes</u> Discrete? _____ Discontinuous? _____

2)

a. $f(0) = 3$	b. $f(1) = -0.5$
c. $f(-2) = 4$	d. $f(2) = -1$
e. $y = 4$, $x = -2$	
f. $f(x) = 0$, $x = 1/2$ & -4.5	
g. $f(x) = 3$, $x = 0$ & -2.5 OR -2.75	

- 3) Tell if the following are functions or not. Explain how you know if it is or not? Use words here!

a.

Yes, pass VLT

b.

No, x values repeat

x	y
2	6
1	5
0	4
-1	3
-2	2

c.

Yes, x values Don't repeat

d.

Jenny is watching her credit card bill. Each month she pays \$500 to it but then charges another \$600 to it.

No, each month has many diff. values

4) The average salary of a garbage man (in thousands) from 1985 to 2001 is represented by the function $f(x) = 145x + 192$ where x is the number of years since 1985.

a. Find the value of $f(5)$. Explain what the number means in terms of the problem.

$145(5) + 192 = 917$ In 5 yrs from 1985, a garbage man's salary is \$917,000.

b. Find the value of x when $f(x) = 1000$. Explain what this means in terms of the problem.

$145x + 192 = 1000$
 $\begin{matrix} 145x & + & 192 & = & 1000 \\ -192 & - & 192 & & \end{matrix}$
 $\frac{145x}{145} = \frac{808}{145}$ $x = 5.6$ In 5.6 yrs from 1985, a garbage man makes \$1,000,000.

c. Find the value of $f(10)$. Explain what the number means in terms of the problem.

$145(10) + 192 = 1642$ In 10 yrs from 1985, a garbage man makes \$1,642,000.

d. Find the value of x when $f(x) = 1500$. Explain what this means in terms of the problem.

$145x + 192 = 1500$
 $\begin{matrix} 145x & + & 192 & = & 1500 \\ -192 & - & 192 & & \end{matrix}$
 $\frac{145x}{145} = \frac{1308}{145}$ $x = 9$ In 1994, a garbage man will make \$1,500,000.

5) Given $f(x) = -10x - 9$ and $j(x) = 7x + 4$ answer the following.

<p>a. $f(x) + j(x)$</p> <p>$-10x - 9 + 7x + 4$</p> <p>$-3x - 5$</p>	<p>b. $f(0) + j(2)$</p> <p>$X=0$ $X=2$</p> <p>$-10(0) - 9 + 7(2) + 4$</p> <p>$-9 + 18$</p> <p>9</p>	<p>c. $j(-3) - f(-3)$</p> <p>$X=3$ $X=-3$</p> <p>$7(-3) + 4 - (-10(-3) - 9)$</p> <p>$-17 - 21$</p> <p>$-38$</p>	<p>d. $j(x) - f(x)$</p> <p>$7x + 4 - (-10x - 9)$</p> <p>$7x + 4 + 10x + 9$</p> <p>$17x + 13$</p>
--	---	---	--

6) Write out all the definitions for the following words.

a. Domain

b. Range

c. x-intercept

d. y-intercept

e. Absolute max

f. Absolute min

g. Relative max

h. Relative min

j. End behavior

k. Constant

m. Increasing

n. Decreasing

7) Given the following graph, answer the following questions.

a. When is $f(x) > g(x)$?

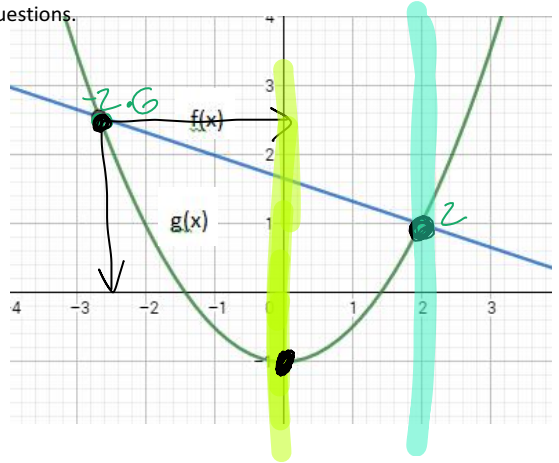

$(-2.6, 2)$

b. Where is $f(x) = g(x)$?

$(2, 1) (-2.6, 2.5)$

c. What is the value of $f(2) + g(0)$?

$x=2 \quad 1+1=0$

8) Label the end behavior for the following graphs. Be sure you watch your negatives and positives.

$x \rightarrow -\infty, y \rightarrow \infty$
 $x \rightarrow \infty, y \rightarrow -\infty$

$x \rightarrow -\infty, y \rightarrow -\infty$
 $x \rightarrow \infty, y \rightarrow \infty$

$x \rightarrow -\infty, y \rightarrow \infty$
 $x \rightarrow \infty, y \rightarrow \infty$

$x \rightarrow -\infty, y \rightarrow -\infty$
 $x \rightarrow \infty, y \rightarrow -\infty$

9) How do you know if something is a function or not? What are the two main things that you need to test/know in order to prove something a function or not?

* X Values do not repeat
 * pass vertical line test

* Only cross y-axis once
 * Every input has only one output
