

Warmup

① Simplify

$$-3x\sqrt{4x^2} - 9\sqrt{9x^4}$$

$\begin{matrix} \wedge & & \wedge \\ 2 & & 2 \\ \text{XX} & & \text{XX} \\ \text{XX} & & \text{XX} \end{matrix}$

$$-3x \cdot 2x - 9 \cdot 3x^2$$

$$-6x^2 - 27x^2$$

$$\boxed{-33x^2}$$

$$x^2 \cdot x^2 = x^4$$

$\frac{\text{cm}}{\text{sec}}$

(show work)
② Simplify

$$-3\sqrt{2} + 9\sqrt{8} - 6\sqrt{18}$$

$\begin{matrix} \wedge & & \wedge \\ 2 & & 2 \\ \text{XX} & & \text{XX} \\ \text{XX} & & \text{XX} \end{matrix}$

$$-3\sqrt{2} + 9 \cdot 2\sqrt{2} - 6 \cdot 3\sqrt{2}$$
$$-3\sqrt{2} + 18\sqrt{2} - 18\sqrt{2}$$

$$\boxed{-3\sqrt{2}}$$

③ Convert
450km per day
to cm per sec.

$$\frac{450\text{km}}{1\text{day}} \cdot \frac{1\text{day}}{24\text{hr}} \cdot \frac{1\text{hr}}{60\text{mins}} \cdot \frac{1\text{min}}{60\text{sec}}$$

$$= 0.00521 \frac{\text{km}}{\text{sec}}$$
$$\boxed{521 \text{ cm/sec}}$$

move decimal
5 right

4 times side length

How would you define perimeter?

Add all sides

How would you calculate the perimeter of a square?

Add all sides together equal sides

1. A rectangle has a length of 30 cm and height of 53 mm. What is the perimeter of this rectangle in centimeters?

2. A rectangle has a length of 45 feet and height of 20 yards. What is the perimeter of this rectangle in feet?

3. A square has a side length of 520 meters. What is the perimeter of the square in kilometers?

4. A right triangle has legs of 2 feet and 18 inches. What is the perimeter of the triangle in inches?

How would you define area?

Multiply \rightarrow $l \cdot w$ square rectangle
 $b \cdot h$

How would you calculate the area of a rectangle? A triangle?

Area triangle $= \frac{1}{2} \cdot b \cdot h$

5. A rectangle has a length of 8.2 cm and a height of 42 mm. What is the area of the square in square millimeters?

6. Find the area of the triangle shown below in square inches.

$$\frac{1}{2}bh$$

$$\frac{1.5\cancel{ft}}{1} \cdot \frac{12\cancel{in}}{1\cancel{ft}} = 18\text{ in}$$

$$\frac{1}{2} \cdot 18 \cdot 10 = 90\text{ in}^2$$

7. A square has a side of length 1.6 yards. What is the area of the square in square inches?

$$1\text{ yd} = 3\text{ ft}$$

$$1\text{ ft} = 12\text{ in}$$

$$\frac{1.6\cancel{yd}}{1} \cdot \frac{3\cancel{ft}}{1\cancel{yd}} \cdot \frac{12\cancel{in}}{1\cancel{ft}}$$

$$57.6 \cdot (57.6) = 3317.76\text{ in}^2$$

8. Find the area of the triangle shown below in square centimeters.

9. A rectangle has an area of 12m^2 and a length of 400 cm . What is the width of the rectangle?

- a. 3 cm
- b. 30 cm
- c. 300 cm
- d. 3000 cm

2 right

$$400$$

$$300 = 300\text{ cm}$$

10. The length of a football field is 100 yards. Which of the following would be equivalent (the same) to the length of a football field?

- a. 300 feet
- b. 100 meters
- c. 9,144 cm
- d. 914.4 cm
- e. 10,000 cm

100 yds

$$1\text{ yd} = 3\text{ ft}$$

$$1\text{ m} = 39.37\text{ in}$$

$$1\text{ ft} = 12\text{ in}$$

$$\frac{100\cancel{yds}}{1} \cdot \frac{3\cancel{ft}}{1\cancel{yd}} = \frac{300\cancel{ft}}{1} \cdot \frac{12\cancel{in}}{1\cancel{ft}} \cdot \frac{1\cancel{m}}{39.37\cancel{in}} = 91.44\text{ m}$$

$$91.44 \rightarrow 9144\text{ cm}$$
