

Warmup

1) You are training for a marathon. You start running 3 miles a week and then each week increase it by 2 miles. **Linear or exponential?** What would be the domain? Write it in words and set notation.

x-values - weeks

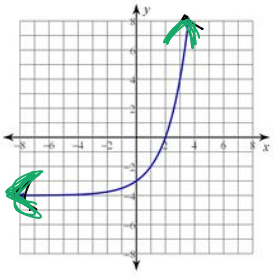

$$\{1, 2, 3, \dots, \infty\}$$

2) You have \$4000 in an account that gains 5% interest every second of every minute for the rest of your life. **Linear or exponential?** What would be the domain? Write it in words, interval and inequality notation.

secs / time

$[0, \infty)$ Interval

6.

x	y
0	4
1	12
2	36
3	108

 $\begin{matrix} \rightarrow \times 3 \\ \rightarrow \times 3 \\ \rightarrow \times 3 \end{matrix}$

Equation: $y = 12(3)^{x-1}$

Circle One: Linear Exponential Neither
Circle One: Discrete Continuous
 Domain? $\{0, 1, 2, 3\}$ Range $\{4, 12, 36, 108\}$
*least to greatest

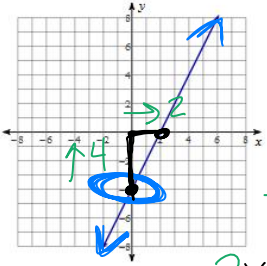

7.

Cashiers	Items scanned
1	20
2	40
3	60
4	80

 $\begin{matrix} \rightarrow +20 \\ \rightarrow +20 \\ \rightarrow +20 \end{matrix}$

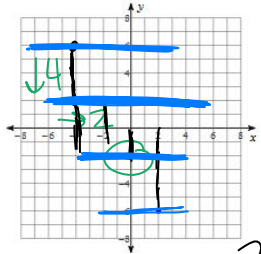

Equation: $y = 20x$ $20 + 20(n-1)$
 ~~$+20n$~~

Circle One: Linear Exponential Neither
Circle One: Discrete Continuous
 Domain? Cashiers $\{1, 2, 3, 4\}$
 Range: Items Scanned $\{20, 40, 60, 80\}$

8. 

Equation: $y = 2x - 4$
 (hint: make a table from the points on the graph)

Circle One: Linear Exponential Neither
Circle One: Discrete Continuous
 Domain? $(-\infty, \infty)$
 $-\infty < x < \infty$

9. 

Equation: $y = -2x - 2$
 (hint: make a table from the points on the graph)

Circle One: Linear Exponential Neither
Circle One: Discrete Continuous
 Domain? $\{-4, -2, 0, 2\}$
 Range: $\{-6, -2, 2, 6\}$

10.

Year	Profit
0	100
1	200
2	400
3	800

 $\begin{matrix} \rightarrow \times 2 \\ \rightarrow \times 2 \\ \rightarrow \times 2 \end{matrix}$

Equation: $y = 200(2)^{x-1}$

Circle One: Linear Exponential Neither
Circle One: Discrete Continuous
 Domain? Year $\{0, 1, 2, 3\}$
